FOR IMMEDIATE RELEASE

MEDICITY DEMONSTRATES CERTIFIED MEANINGFUL USE MODULES ON THE iNEXX PLATFORM AT HIMSS11

ORLANDO – FEBRUARY 21, 2011 – Medicity, the standard for health information exchange (HIE) solutions nationwide, will showcase 15 applications – including its ONC-certified suite of meaningful use apps – on its iNexx platform this week at HIMSS11 in Orlando.

iNexx is an open technology platform for health information exchange that enables physician practices and other providers to better coordinate patient care. It also serves as the operating environment for a new generation of modular applications that leverage the platform's information, connectivity, and services to achieve significant functionality at low cost.

Medicity will demonstrate 15 of these apps at HIMSS11 Booth 6749, with a focus on its suite of applications certified to enable eligible providers to meet all the requirements for meaningful use. Apps include Referrals, Virtual Care Team Reconciliation, Clinical Quality Measures, Public Health Reporting, Patient Reminders, Medication Management, and more.

iNexx modules are 2011/2012 compliant and have been certified by Drummond Group, an ONC-ATCB approved to certify any complete or modular EHR both ambulatory and inpatient, in accordance with the applicable certification criteria adopted by the Secretary of Health and Human Services. The certified iNexx modules encompass all General Criteria (170.302 A through V), all Ambulatory Criteria (170.304 A through I), as well as Ambulatory Clinical Quality Measures NQF 0013, 0018, 0024, 0028, 0038, 0041, 0043, 0086, and 0421.

"We are excited to demonstrate how the iNexx platform enables any provider – regardless of the level of technology already in place in their practice – to coordinate care and to meet meaningful use requirements without disrupting workflow," said Robert Connelly, Medicity SVP of Innovation. "iNexx is designed to ensure that every member of the care team in the community, including patients, can connect and communicate to improve care."

About Medicity

Medicity, the industry standard for health information exchange (HIE), is the leading innovator and largest provider of HIE technology – with more than 750 hospitals and 250,000 end users in its connected ecosystem. Medicity's solutions empower hospitals, physicians and HIEs with secure access to and exchange of health information – improving the quality and efficiency of patient care locally, regionally and nationally.
