

HEALTH CATALYST INTEROPERABILITY EXCHANGE CLINICAL DISPATCHER

STRENGTHEN CARE COLLABORATION ACROSS THE CONTINUUM

Now more than ever before, providers need a quick and secure method for sharing data with payers. The demand for real-time clinical insight to support care management and quality improvement efforts continues to grow, making it imperative that providers have an efficient and effective way to transform lab values, medication histories and other clinical information into discrete data elements that can be used to power population health efforts.

HOW IT WORKS

Clinical Dispatcher is an extensible solution for sending HL7 data to multiple payers. Clinical data assets from electronic health records and other source systems are matched against a health care organization's master patient index and then routed to payers as discrete data elements based on member file matching. Users can customize source and data types by payer. Providers have the option of also using Clinical Dispatcher to facilitate self-pay filtering, data normalization and data transformation.

CLINICAL DATA SUPPORTED WITH CLINICAL DISPATCHER

CLINICAL DISPATCHER BENEFITS

With Clinical Dispatcher, your organization can:

- **Better identify high-risk individuals.** Sharing real-time clinical data with payers gives all members of a patient's care team a more complete view of potential health risks and opportunities.
- **Improve care coordination.** Enable more comprehensive, coordinated health interventions based on the most recent clinical data.
- **Create a streamlined process.** Eliminate the need for manual intervention and speed the delivery of clinical information to payers with system-driven adjudication.
- **Support quality improvement efforts.** Quickly and efficiently send accountable care organization, Healthcare Effectiveness Data and Information Set, Physician Quality Reporting System and other standard quality measures to multiple payers based on custom rules.
- **Increase patient engagement.** Better address complex patient needs through a data-driven, integrated engagement experience.

Securely share clinical data with payers for more coordinated, collaborative care.

If you're ready to start sending clinical data to payers, let HCI get you there. Contact a Health Catalyst Interoperability representative today at info@medicity.com to discuss the implementation process and pricing options.
